

PRESERVE

Sustainable packaging with tailored end of life

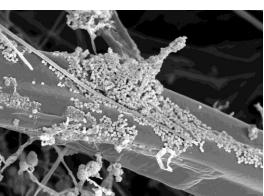

CENTEXBEL

- © Collective research and technical centre
- © Focus on 'Textiles' and 'Plastics'
- 180 collaborators 3 sites in Belgium
- Well-equipped testing laboratories:
 physical chemical fire microbiological
- Pilot platforms:
 extrusion textile coating & finishing

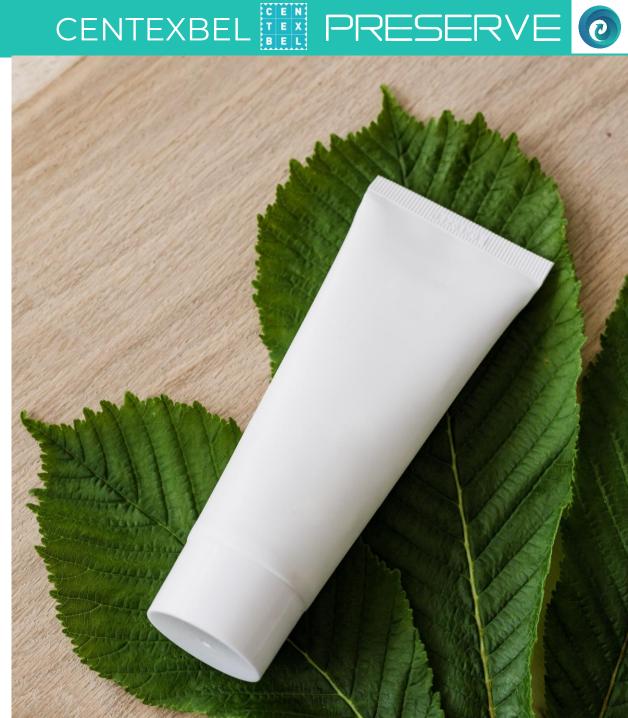

OUTLINE

- O PRESERVE and its goal
- O Highlighted activities
 - Bioplastic multilayers
 - Oupcycling
- Take home messages

PRESERVE GOAL

Need for high performance biobased packing to meet EU sustainability goals

- © Enchance bio-based packaging properties and recyclability
- Recovery and reintroduction of biopolymers
- Outpose Upcycling of secondairy raw materials in non-food

PRESERVE

Biobased & recyclable food packaging

- Snack flowpack
- Beverage cups, bricks
- © Etc.

Recycled personal care and transport packaging

- © Carrier box
- Injected jar
- © Etc.

PARTNERS

OUTLINE

- PRESERVE and its goal
- O Highlighted activities
 - Bioplastic multilayers
 - Oupcycling
- Take home messages

BIOPLASTIC MULTILAYERS

- © Can we switch to biobased multilayers
- © Can we switch to biobased (PHA) barrier coatings for cups, bricks, trays, etc.?
- O How do we ensure recyclability?

PLA OR BIOPET PACKAGING

- Protein coatings
 - Improved OTR
 - © Eases separation
- Metalization of protein or PLA layer
- Biobased adhesives
 - OBio-PU
 - OProtein based hotmelt

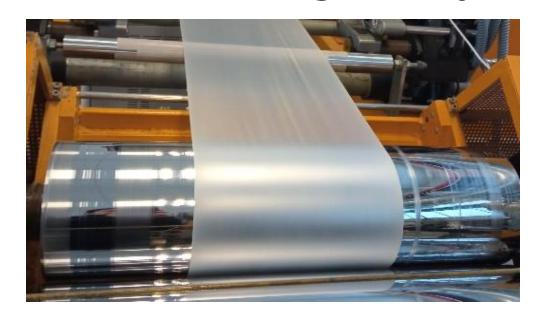

PHA COATING

- Biopolymer produced by bacteria
- ② Applicable on paperboard (wet or extrusion coating)
- © Good WVTR: 17g/m².day

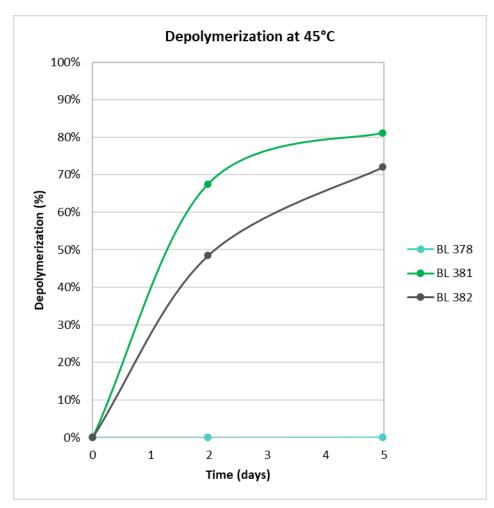

HOW TO RECYCLE?

- Overifying automated sorting
- Optimizing layer separation
- Repulpability
- © Compostability©PLA with improved compostability
- Outpossible of Upcycling of materials or blends

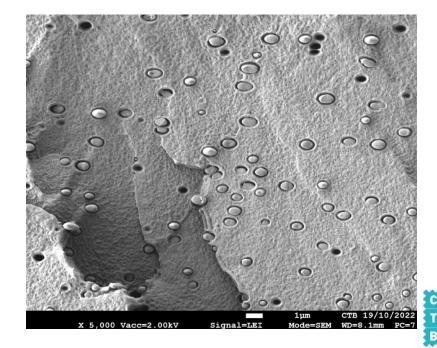

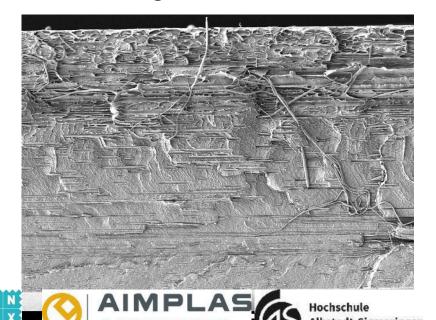

UPCYCLING: MICROFIBRILLAR REINFORCED FILM

- O LDPE fortified with PA and PLA fortified with PLA
- @ 10-25% increase in modulus
- @ 10% (MD) and 100% (TD) increase in tensile strength
- @ e-beam reduces OTR and WVTR bij 10-15%

OUTLINE

- PRESERVE and its goal
- O Highlighted activities
 - Bioplastic multilayers
 - Oupcycling
- **©** Take home messages

TAKE HOME MESSAGES

- O Viable biopolymer multilayers
- PHA shows new potential as barrier coating
- Oblight Blends of r-PLA or rPE-PA can be self-reinforced
- Outpose Upscaling ongoing
